Previous Versions..This invention relates to spatial light modulators and, more particularly, to spatial light modulators for use in Projection Television applications and in other optical applications. Spatial light modulators are used for creating and projecting a wide range of optical images. In one specific application, spatial light modulators are used in Projection Television applications, as disclosed, for example, in U.S. Pat. No. 5,521,748, entitled xe2x80x9cSpatial Light Modulators and Projection Television Systems Employing Them,xe2x80x9d assigned to the same assignee as this application. In addition to their use in Projection Television applications, spatial light modulators are also used for a broad range of other imaging applications. The typical spatial light modulator employed in Projection Television and other imaging applications projects a light image from a light source onto a spatial light modulator. The spatial light modulator, in turn, projects the light image, e.g., a picture, from the spatial light modulator to a projection lens that projects the light image onto a viewing screen f678ea9f9e
